Wound Healing

Less Pain, Less Swelling, Quicker Recovery

Your pets are part of your family and you want them to have the best quality of life. Laser therapy can help achieve that goal. We have the most advanced equipment on the market to deliver those results.

Conditions that can be improved include:

- Arthritis
- Acute & Chronic Pain
- Back Injuries
- Sprains & Strains
- Inflammation & Edema
- Wound Healing

Laser therapy has many benefits for your pet. Your pet will not feel any discomfort during treatments. Often, pain medications can be reduced or eliminated after laser therapy treatments.

For over 30 years laser therapy has been used to successfully treat conditions in humans. We are pleased to offer this exciting benefit for your pet.

What advantages does Laser Therapy have over other forms of therapy?

Does not require the use of drugs or surgery

Fewer side effects / risks

Quick and convenient

Studies show that it is equal to or more effective than other forms of physical therapy

Benefits include:

Non-surgical treatment

No patient sedation or restraint required

Extremely safe with no side effects

Can be combined with other medications or other arthritis treatments

Immediate results: Most treated pets feel better in 12 to 24 hours after treatment

Speeds healing process

Effectively treats the most common causes of pain.

No pet owner wants to see their pet suffer from muscle and joint pain. Have you noticed your pet slowing down, having trouble with everyday movement?

As your dog ages the probability of arthritic pain increases greatly: at ages 8-10 years 27% of dogs suffer from arthritis. The number increases to 37% for dogs 11-13 years old. If you've seen signs your dog is slowing down, this may be due to joint and muscle pain common in arthritis.

It is difficult to diagnose arthritic pain in cats due to their stoic nature. If you've noticed your feline friend slowing down, having problems reaching the litter box, or isolating themselves from the family, pain may be the cause.

The doctors and staff hate to see your pet suffer from joint and muscle pain. We have the latest in laser therapy treatment options to provide an alternative solution to traditional pain management. Ask us how Laser Therapy may provide a solution to your pet's muscle and joint pain.
